

# Empowering Excellence: Leadership in Driving Good Governance and Sustainability

The course delves into the essential role of leadership in fostering effective governance and sustainable practices. It explores how leaders can inspire ethical behaviour, promote transparency, and implement strategies that ensure long-term organisational success while addressing social and environmental responsibilities.

This course is suitable for you if you are interested in;

01. Understanding of sustainability principles, including environmental, social, and governance (ESG) factors, and their relevance to the organisation's long-term success.
02. Incorporating sustainability into the organisation's strategic planning process, ensuring that sustainability goals align with overall organisation objectives.
03. Enhancing leadership and stewardship to make informed decisions that balance organisation performance with good governance practice and sustainability agenda.

## Who Should Attend the Course?

- ✓ Grade 54 Jusa C (Deputy vice-chancellor, Head of Department, Professor, Associate Professor etc.)
- ✓ Professionals within the portfolio of sustainability, strategy, development.
